DETAILED ACTION

Specification

1. The specification of the disclosure is objected to because the continuation applications should include the Patent numbers. Correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 6,371,370 (hereinafter '370 Patent). Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claimed invention is somewhat a broader recitation of the '370 Patent. For instance, in claim 1 of the present claimed invention and '370 patent, the applicants claim:

i)"generating a light beam and delivering the beam to a surface . . .", whereas in the '370 Patent the applicants claim "an optical system to generate a light beam and to deliver the beam to a surface . . .";

ii)"detecting a response of the surface to the light beam . . .", whereas in the '370 Patent

Art Unit: 2876

the applicants claim “a detector for detecting a response of the surface to the light beam . . .”;

iii)”moving the light beam and surface with respect to one another at relative speed . . .”,

whereas in the ‘370 Patent the applicants claim “a propulsion system for moving the surface. . .

reciprocating motion with respect to the light beam. . .”; and

iv)”wherein a voice coil provides the reciprocating”, whereas in the ‘370 Patent the applicants claim “wherein the propulsion system comprises a voice coil”

As to the claims 1-21 of instant application, the ‘370 Patent meets all the limitation as set forth in claims 1-15.

Thus, in respect to above discussions, it would have been obvious to an artisan at the time the invention was made to use the teaching of claims 1-15 of ‘370 patent as a general teaching for the scanning function to perform the same function as claimed in the present invention. The instant claims obviously encompass the claimed invention of the ‘370 patent and differ only in terminology. The extent that the instant claims are broaden and therefore generic to claimed invention of ‘370 patent [species], In re Goodman 29 USPQ 2d 2010 CAFC 1993, states that a generic claim cannot be issued without a terminal disclaimer, if a species claim has been previously been claimed in a co-pending application.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from the claims in a first patent. IN re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. & 1.321(b) would overcome an actual or provisional rejection on this ground provided the

Art Unit: 2876

conflicting application or patent is shown to be commonly owned with this application. See 37 C>FR> &1.78(d).

Allowable Subject Matter

6. Claims 1-21 would be allowed **upon filing of a timely terminal disclaimer.**

Response to Arguments

4. Applicant's arguments, see pages 7-9, filed 4/06/04, with respect to the rejection(s) of claim(s) 1-10 and 12-21 under prior arts have been fully considered and are persuasive.

Therefore, the rejection has been withdrawn. However, the double patent rejection remains.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
